

Quick Start Guide

Before using the vacuum cleaner, please open the dust bin and take out the nozzle. The IN02 Vacuum offers two modes: **Floor Mode** and Tool Mode.

Switching Modes:

To switch between modes: Insert or remove the hose connector from the rear hose cuff.

Floor Mode (Hose connector inserted into the cuff):

1. Power On: Plug in the power cord and press the power button. The Floor Mode and sensor icons will illuminate solid white.
2. Vacuuming: Sweep debris toward the air

inlet. The motion sensor will automatically activate the vacuum for 6 seconds.

3. **Manual Activation:** Press the activate button or tap the unit's lower front with a broom. Each manual activation lasts 6 seconds.

4. **Disable Motion Sensor:** Press the mode switch button to disable the motion sensor. The vacuum can then be operated only by pressing the activate button or tapping the front.

Tool Mode (Hose connector removed from the cuff):

1. **Power On:** Plug in the power cord and press the power button. The Tool Mode icon will light up solid white.

2. **Vacuuming:** Press the activate button to start vacuuming at low power. Press the mode button again to switch to high

power, if needed.

3. Pause: Press the activate button to pause the vacuum.

4. Switch Back to Floor Mode: Reinsert the hose connector into the cuff.

Maintenance Tip:

Over time, the filter sponge and air purification HEPA filter may become clogged, affecting performance. Be sure to clean them regularly and dry them thoroughly before reuse. If the filters become unusable, email us for a free replacement. We offer a **free replacement service for 5 years.**

Important: Never operate the vacuum without the filters properly installed. Support

Email: **support@Gavasto.com**

We guarantee to resolve any issues within 8

hours.
